Subject: Analytical Results from HTS Incident

Hello Michelle and Charlie –

HTS has been working endlessly on gathering, testing, and compiling data from the 7/13/13 incident. Thank you for your patience with us during this time. We needed this time to ensure that the samples were collected and tested properly. The most recent round of samples are currently on their way to a lab and we expect to have results by Monday. With that being said, we plan on providing both Ohio and US EPA with those results by close of business Monday (7/22/13). Should there be an unforeseen circumstance that delays this release, I will notify you. Both US and Ohio EPA will have the results prior to HTS releasing the results to the public.

I will be out of the office next week. If you have any questions regarding this email or the results, please contact Evonne Masello or Jim Davis. They will be able to contact me or get you in touch with someone that can help.

Again, thank you for your patience during this time.

Sincerely

Carrie Beringer
